About Us

About Us

PT. SASUKUTTA METROLOGY INDONESIA

(SASUKUTTA) is a company that has been established since 2019, which has an address at JL. A.H Nasution No. 114

B. PT Sasukutta Metrology Indonesia is engaged in calibration services for measuring instruments, tanks, and sales of measuring instruments.

PT. Sasukutta Metrology Indonesia has prepared the scope of the magnitude of Temperature, Mass, Time, Dimension, Volume, PT Sasukutta Metrology Indonesia has collaborated with large industrial companies in Indonesia, such as the Palm Oil Processing Refinery Industry, the Palm Oil Mill Industry, Gas Stations and the Oil and Gas Refinery Industry.

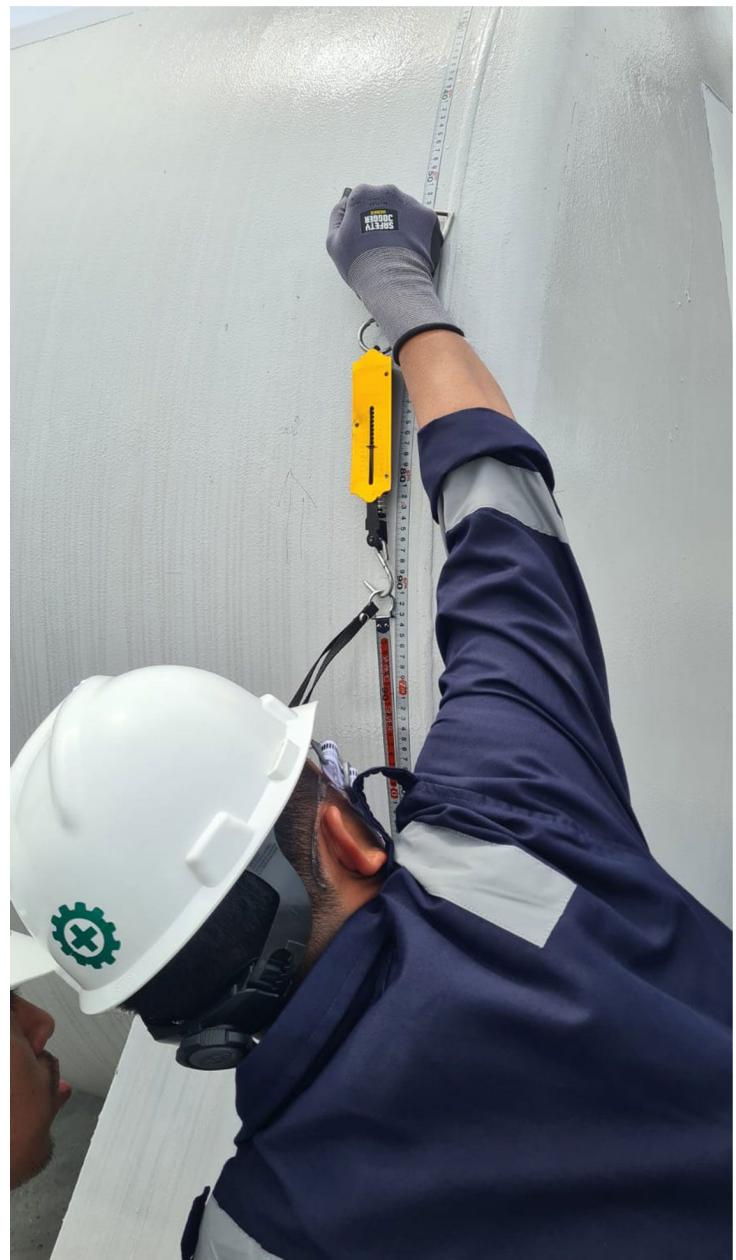

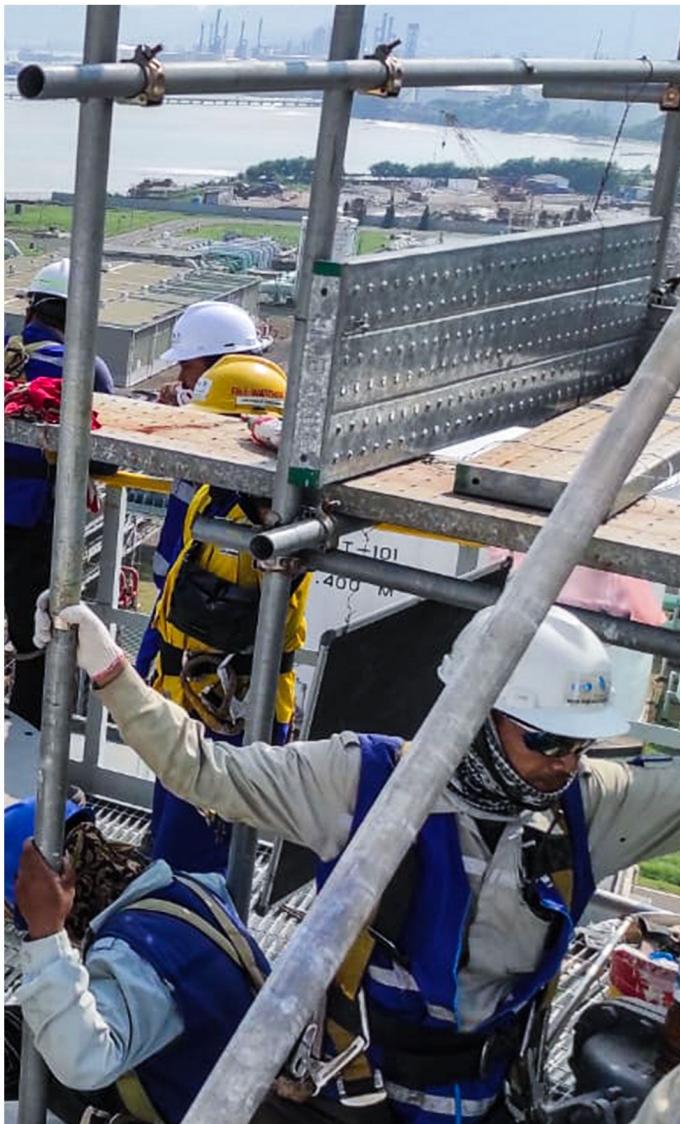

In addition to providing calibration services, PT Sasukutta can also provide post-calibration services, such as training / consultation for the use of calibration results.

PT. Sasukutta guarantees that the entire calibration process is guaranteed traceability and quality and also ensures that all standard tools used are routinely verified for measurement results and routine calibration that has been established to ensure the quality of measurement results.

PT. Sasukutta also ensures that all personnel in the field and in the laboratory have received regular training to ensure the quality of measurement and calibration results. All PT. Sasukutta personnel are also trained to be able to provide solutions to problems that often occur in the field.

Based on the company's slogan, "*Treacebility For Trust*" PT. Sasukutta Metrology Indonesia is ready to partner with all industries to ensure product quality.

Our Services

Our
Services

Our Services

In the middle of rapid industrial development, PT. SASUKUTTA is here as a solution to ensure that measuring instruments function accurately. With services supported by qualified technology along with a team of experts, we are committed to providing the best service.

The services provided by PT. SASUKUTTA are as follows:

Vertical Tank Calibration

Vertical tank calibration is an important process to ensure that tanks function according to specifications and provide accurate measurement results, especially in industrial sites that require monitoring the volume of materials stored in tanks, such as: *Oil, chemicals, water and gas.*

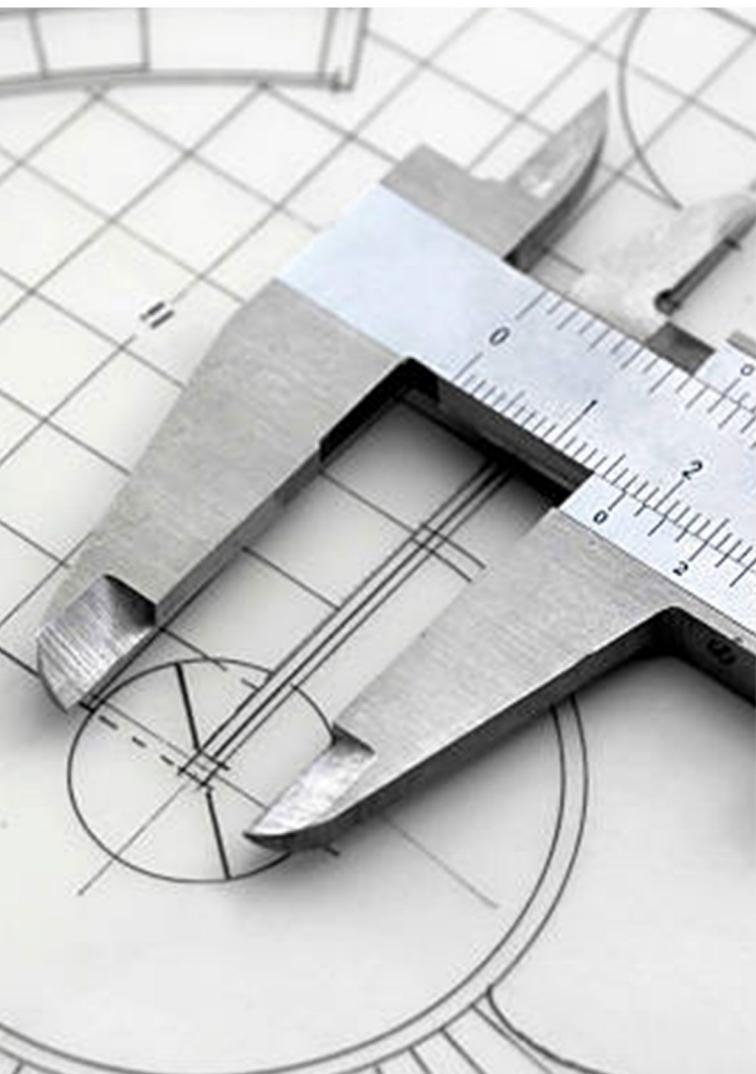

The calibration process can be carried out by several methods, one of which is the “Geometry” method, a calibration method by taking physical measurements of the tank to determine the relationship between liquid height and volume contained.

Horizontal Tank Calibration

Not only vertical tanks, PT. Sasukutta also serves horizontal tank calibration requests.

Horizontal tanks are widely used in the industrial world to store liquid logistics of fuel, raw materials, to chemical liquids.

Instrument Calibration

PT. Sasukutta Metrology Indonesia also provides calibration of measuring instruments, this is an important process to ensure the quality of products produced by the factory. Of course PT Sasukutta is present and supports the process by providing Measuring Instrument Calibration Services, measuring instrument calibration services can be carried out in the laboratory of PT Sasukutta Metrology Indonesia (InSitu) or outside the laboratory (ExSitu).

In calibrating measuring instruments, of course, it has a scope, our scope in the process of calibrating measuring instruments is:

TEMPERATURE

MASS

DIMENSION

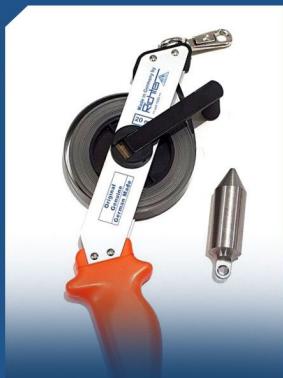

VOLUMENTRY

TIME

Instrument Sales

Not only providing calibration services, PT. Sasukutta Metrology Indonesia also provides measuring equipment. The measuring instruments that PT. Sasukutta Metrology Indonesia provides are:

Sounding Tape

Depth Stick

Measuring Vessel

Electronic Scales

Weights

Services and Maintenance

In addition to Instrument Sales, PT. Sasukutta Metrology Indonesia also provides service for measuring instruments that have entered the maintenance period to replace spare parts if needed.

PT. Sasukutta Metrology Indonesia also cooperates with government parties such as the Metrology Directorate of the Ministry of Trade, the Legal Metrology Standardization Center, the Regional Legal Metrology Unit, to assist in the Calibration & Recalibration Process, and Licensing of Measuring Instruments.
